FIG. 2b

FIG. 2c

derived from the long-, medium-, and short-timescale data are presented in Figs. 2a, 2b, and 2c, respectively. The vertical axi
s is temporal frequency in units of Hz. In all cases, the first three points of the PDS have been suppressed as they represent
ccurately determined. The dots are the individual points in the PDS, while the large symbols are results of logarithmic binni
licity, and the binned points were fitted with a power-law model, as discussed in the text.
